AI Overview

Using `\usepackage{polyglossia}` causes errors when your LaTeX project compiles with standard `pdfLaTeX` instead of `XeLaTeX` or `LuaLaTeX`, because Polyglossia requires a modern Unicode-aware engine. Overleaf

Fixing Compiler and Package Errors

- Change your compiler to **XeLaTeX** or **LuaLaTeX** in your editor settings (such as Overleaf).
- Remove old encoding packages like `\usepackage[utf8]{inputenc}` and `\usepackage[T1]{fontenc}` as they conflict with these engines.
- Ensure you set a main language using `\setdefaultlanguage{english}` (or your preferred language) right after loading the package.
- Verify that your TeX distribution has full support and hyphenation patterns installed for the specific language definitions you call. TeX - LaTeX Stack Exc... +2

If you can share the **exact error message** or the **name of the language** you are trying to set, I can help you fix your document setup.
